

# Vermont Credential Transparency Project

## The Problem

The credential marketplace can be overwhelming and hard to navigate. Vermonters deserve access to clear and accurate information in order to find the educational pathway that best fits their lives.

## The Solution

**Our goal is to inventory all postsecondary credentials available in Vermont by 2022 for the benefit of our students, workers, education and training providers, and policymakers.**

Advance Vermont is partnering with Vermont education and training providers to build a comprehensive inventory of credential programs in Vermont. The first round of information will be available through Advance Vermont's MyFutureVT career and education resource hub, coming in early 2021.

## Benefits to Vermont

### Individuals

Access to clear and accurate program information empowers students and workers to find the credential that works best for their education and career goals.

### Employers

Increased knowledge of the credential options leads to new partnerships with education and training providers, and more informed hiring decisions.

### Policymakers

Comprehensive program and credential information helps inform workforce development and education policy decisions.

### Education and Training Providers

New marketing opportunities for regional and national exposure to Vermont's programs and new data to make informed choices about program offerings and delivery models.
